PROFESSIONAL SUMMARY

Product and Solution Analyst experienced in turning complex business requirements into feasible designs, precise functional specifications and successful releases, from requirements discovery through release validation. Specialises in Dynamics, Salesforce and SAP integrations supporting order-to-revenue and revenue recognition, with responsibility spanning feasibility, development, QA and UAT. Nine years at SAP across partner enablement, co-innovation, customer discovery and design thinking, then delivery for Hiromori Japan, Aspermont and Standard Chartered across APJ and EMEA. Works in agile (SAFe-trained) with global teams, applies AI tools (RAG and LLM in Python and .NET) to analysis, and coaches analysts and product owners on requirements quality.

EXPERIENCE & SKILLS

CORE COMPETENCIES

Functional Design & Analysis

Requirements Analysis · Feasibility Studies · Functional Documentation · Functional & Product Specifications · Interface & Integration Specifications · Data Mapping · Use Cases & User Journeys · Acceptance Criteria & Test Scenario Review · Release Validation & Sign-off

Customer & Discovery

Customer Discovery · Design Thinking · User Feedback Analysis

Integrations & Platforms

Microsoft Dynamics CRM · Salesforce · SAP S/4HANA · SAP RAR · SAP HANA · Integration Architecture · API Design & Governance

Domain

eCommerce · Financial Services · Finance & Revenue (ASC 606 / IFRS 15) · Multi-country Rollouts · Audit Readiness

Delivery

SAFe (trained) · Scrum · Backlog Refinement · Dependency & Risk Management · Onshore-Offshore, Multi-time-zone Teams · JIRA · Confluence Wiki · Mentoring & Team Onboarding

Technology & AI

.NET / Blazor · Python / FastAPI · SQL Server · PostgreSQL / pgvector · RAG & Vector Search · LLM Integration (Claude API, Ollama)

Independent Consultant (Product Management)

Sep 2024 – Present

Remote

- Advise enterprise clients across APJ and EMEA on product and solution delivery, running roadmap, backlog and release governance under SAFe cadences, with ROI reporting to client executives.
- Write functional specifications, user stories and acceptance criteria, lead backlog refinement and iteration planning, and sign off releases through UAT with client stakeholders.
- Design integration and API governance across Salesforce and SAP (interface ownership, data-flow standards, compatibility checks) for 3+ concurrent multi-country eCommerce programs; every active client retained for follow-on work.

Director of Product Leadership — NielsenIQ

Sep 2022 – Apr 2024

Chennai, India (Hybrid)

- Designed a bi-directional Dynamics–SAP integration and governed data layer for order-to-revenue flows. Defined the solution design, data mappings and interface rules with architects and developers, removing 200+ manual hours a month for around 4,000 users.
- Held feedback sessions directly with sellers and other users to see where they got stuck, and built an in-house tool to collect user feedback and input continuously, so requirements and priorities came from observed user behaviour.
- Redesigned seller workflows in Microsoft Dynamics CRM across 3+ business units and rationalised a Salesforce migration into fewer-click processes, cutting seller cycle time by 40%.
- Set functional-quality standards across releases (acceptance-criteria templates, structured discovery and feedback loops), cutting post-release rework by 30%.
- Prioritised the backlog on ROI, customer demand and business impact using MoSCoW, RICE and WSJF, agreeing trade-offs with business leaders across 3+ business units.
- Hired and coached 5+ product owners (interns and full-time) on requirements quality, story writing and Agile practice, lifting team velocity 25% within two quarters.

Product Owner / Business Analyst — Autodesk

Sep 2021 – Aug 2022

Bengaluru, India (Freelance)

- As SAFe Product Owner, analysed and refined a 200+ item SAP S/4HANA RAR (revenue recognition, ASC 606) backlog. Translated finance requirements into sprint-ready stories and acceptance criteria for onshore and offshore teams across 3 time zones.
- Ran scrum ceremonies for both teams and served as Business Functional Analyst on CoStar / SAP RAR projects.
- Mapped cross-team dependencies and set grooming standards before each iteration, cutting sprint-cycle ambiguity by 20%.
- Delivered 100% on-time sprint completion through early blocker identification and pre-sprint stakeholder alignment.
- Bridged finance and SAP functional teams with clear specifications in JIRA, with zero escalations from internal audit or external reviewers.

EXPERIENCE (CONTINUED)

Technical Product Owner (SCB) & Head of Operations — StratAgile
Apr 2019 – Aug 2021

Kochi, India

- Technical Product Owner, Standard Chartered Bank: owned the backlog and functional rollout migrating 350M+ annual page views and 1,500+ content editors across 10+ ASEAN markets to the Unified Digital Platform; a common UI component library improved page load speed by 35%.
- Head of Operations: ran agile delivery for the Hiromori Japan eCommerce order product built for BMW Japan (iteration planning, backlog refinement, requirements sign-off, test-scenario review, release validation) with zero missed deadlines. Led a 100+ member team (10+ project managers) across 14 countries, defining requirements for clients from start-ups to enterprises, including Aspermont, BMW Japan and Bursa Malaysia.

Independent Consultant I Product & Channel Programs
Aug 2017 – Mar 2019

India, Singapore

- Consulted on creating channel-partner programs (enablement and co-selling), refined through partner satisfaction surveys and performance reviews.
- Consulted on application workflows, defining customer journeys, data flows and process flows, and introduced Agile practice to align product, engineering and marketing teams.

Partner Business Manager, Partner Service Advisor & Customer Evangelist — SAP
May 2008 – Jul 2017

Singapore, China, India

Partner Business Manager, SME Channels (Singapore)

- Recruited 5 SAP Business ByDesign partners in the SME space and, working with partner C-level executives on go-to-market plans, closed SGD 250,000+ in SME license value.
- Governed a 25+ partner ecosystem across 6 SEA markets; built a lean onboarding playbook that cut partner time-to-first-deal to under 9 months.

COE – Database & Technology and HANA; Partner Service Advisor (China)

- Supported the partner ecosystem across SEA on the Partner Edge programme, and the Partner Service Advisors handling 100+ partners, on product promotions and RDS packages.
- Delivered 20+ online workshops across APJ on value-based positioning of S/4HANA, SAP HANA and SAP Business Objects, so partners could position and sell them to customers.

Customer Evangelist (India)

- Ran 3+ Design Thinking sessions at SAP TechEd, turning partner and customer ideas into shared problem statements and solution concepts.
- Joined customer-led discovery sessions across 10+ customer discoveries, capturing needs and feedback that fed solution and co-innovation work.
- Worked with the SAP Co-Innovation Lab (COIL) and Partner Innovation Lifecycle Services teams to bring partner and customer ideas into co-innovation work.
- In a 65-member global team (US, Israel, India), engaged a 2M+ member SAP Community on Database & Technology and Business Analytics through blogs, forums, customer success videos and events.

Earlier career

Senior Analyst I AOL Mobile — Aug 2007 – May 2008

- Automated daily-to-yearly summary reports by consolidating 7 Netezza tables into Excel, avoiding 2 planned hires.
- Integrated the reports with SAP Business Objects (Xcelsius, Crystal Reports) for carrier-specific action plans.

Senior Metrics & Reporting Analyst I Dell International Services — Jul 2002 – Aug 2007

- Led reporting for South-region outsourcing partners and headed the data analysts for North, East and West.
- Started as Technical Support Representative (A+ certified); as Offline Tech Reviewer, top 10 of 300 for the Global Black Belt project.

AI PROJECTS (HANDS-ON)

RAG & LLM workflows

Semantic search with vector embeddings (PostgreSQL / pgvector) and LLM integrations (Claude API, Ollama) in Python and .NET.

Product Operating Model Playbook

Open framework for AI-enabled roadmap, specification and sprint governance. github.com/rammyps/product-operating-model-playbook

ikiastrro

Wrote the functional spec, built the app in .NET, SQL Server and Blazor, and validated every calculation against a reference tool. github.com/rammyps/ikiastrro

EDUCATION

MS, Software Engineering
BITS, Pilani I 2005 – 2007

B.E., Instrumentation and Control Engineering
SRM University, Chennai I 1998 – 2002
