RAMAKRISHNAN PARTHASARATHY

Director of Product | Agile Program Leader | Global Capability Center (GCC) Product & Delivery

Bengaluru, India | rammyps23@gmail.com | linkedin.com/in/rammyps | github.com/rammyps | youtube.com/@rammyps

PROFESSIONAL SUMMARY

Product and program leader with 20+ years running enterprise CRM, ERP and digital platform programs for global organisations across APJ, EMEA and the US. Experienced on both sides of the GCC model: as a product owner and director inside global product organisations (NielsenIQ, Autodesk), and as a delivery head leading 100+ people across 14 countries for Fortune 500 clients. SAFe PO/PM trained, with a record of measurable outcomes: 40% shorter seller cycle time, 30% less post-release rework, 25% higher team velocity, and 100% on-time sprint delivery across onshore and offshore teams.

Hands-on with AI: builds RAG and LLM-enabled applications in Python and .NET and ships products end to end with AI-assisted development, so product, engineering and leadership conversations stay grounded.

CORE COMPETENCIES

Product & Agile: Product Ownership | Roadmap & Backlog Governance | SAFe | Scrum | Sprint Planning | JIRA | OKRs | Discovery & Feedback Loops | Acceptance Criteria Governance

GCC & Program Delivery: Onshore-Offshore Operating Models | Multi-time-zone Delivery | Stakeholder & Executive Alignment | Dependency & Risk Management | Team Scaling | Mentoring Product Owners

Platforms & Technology: Microsoft Dynamics CRM | Salesforce | SAP S/4HANA | SAP RAR | SAP HANA | Integration Architecture | .NET / Blazor | Python / FastAPI | SQL Server | PostgreSQL / pgvector

AI: GenAI Product Management | RAG & Vector Search | LLM Integration (Claude API, Ollama) | AI-enabled Operating Models

Governance & Compliance: TOGAF | ASC 606 / IFRS 15 | Audit Readiness | Product Operating Models

PROFESSIONAL EXPERIENCE

Independent Consultant | Splashed **Jul 2026 – Present**

Remote

- Own the product advisory framework for enterprise consulting engagements across APJ and EMEA, improving roadmap visibility and ROI accountability.
- Design AI-enabled product operating models that let multiple country engagements run concurrently without loss of quality or timeline.
- Building ikiastrro and an open Product Operating Model Playbook (see AI Projects) to stay hands-on with modern product and AI delivery.

Vice President, Product & Consulting Lead (Operations & Business Development) | StratAgile **Sep 2024 – Jun 2026**

Kochi, India

- Ran 3+ concurrent country engagements across APJ and EMEA under an AI-enabled operating model, keeping executive ROI visibility on every account.
- Converted all active client accounts into repeat engagements by putting TOGAF-governed delivery frameworks in place across parallel multi-country eCommerce programs.
- Set up integration governance across Salesforce and SAP platforms, removing delivery misalignment and keeping every engagement compliant.

Director of Product Leadership | NielsenIQ **Sep 2022 – Apr 2024**

Chennai, India (Hybrid)

- Owned the Microsoft Dynamics CRM roadmap across 3+ business units and cut seller cycle time by 40% by redesigning workflows, rationalising a Salesforce migration into fewer-click processes.
- Removed 200+ manual hours a month for 500+ users with a bi-directional Dynamics–SAP integration and a governed data layer for order-to-revenue flows.
- Cut post-release rework by 30% through SAFe discovery, structured feedback loops and acceptance-criteria governance that moved quality checks upstream.
- Coached 5 product owners on sprint rituals and Agile practice, lifting team velocity 25% within two quarters.

Product Owner / Business Analyst | Autodesk **Sep 2021 – Aug 2022**

Bengaluru, India (Freelance)

- Governed a 200+ item SAP S/4HANA RAR backlog across onshore and offshore teams in 3 time zones: 100% on-time sprint delivery and 20% less sprint-cycle ambiguity through grooming standards and dependency mapping.
- Turned ASC 606 / IFRS 15 finance rules into sprint-ready user stories in JIRA, with zero escalations from internal audit or external reviewers.

Technical Product Owner & Head of Operations | StratAgile **Apr 2019 – Aug 2021**

Kochi, India

- Led Standard Chartered Bank's website migration across 10+ ASEAN markets as TPO in its MARTECH tribe, moving 350M+ annual page views and 1,500+ content editors to the Unified Digital Platform under TOGAF principles.
- Improved page load speed by 35% by standardising pages on a common theme and UI component library.
- Led a 100+ member operations team across 14 countries on concurrent eCommerce and digital programs for MoneyGram, BMW, Cathay Pacific and Bursa Malaysia, with zero missed client deadlines.

Independent Consultant | Product & Channel Programs **Aug 2017 – Mar 2019**

India, Singapore, USA

- Led product and channel-partner programs for banks, manufacturers and oil and gas firms, introduced Agile practice, and ran partner enablement and co-selling programs.

Partner Business Manager, SME Channels & COE | SAP **May 2008 – Jul 2017**

Singapore

- Closed SGD 250,000+ in SAP license value across 6 SEA markets through C-level joint GTM, and cut partner time-to-first-deal to under 9 months with a lean onboarding playbook.
- Governed a 25+ partner ecosystem and upskilled 100+ partners through 20+ APJ workshops on SAP HANA, S/4HANA and Business Objects.
- Supported a 2M+ member global community as part of a 65-person team; represented SAP at TechED and InnoJam.

Earlier career: Senior Analyst, AOL Mobile (2007–2008): automated a Netezza reporting pipeline, removing the need for 2 FTEs. Senior Metrics & Reporting Analyst, Dell International (2002–2007): top 10 of 300 for the Global Black Belt quality programme.

AI PROJECTS (HANDS-ON)

- **ikiastrro:** Vedic astrology horoscope application built end to end with AI-assisted development on .NET, SQL Server and Blazor, with every chart validated against an established reference tool. github.com/rammyps/ikiastrro
- **Product Operating Model Playbook:** Open framework for AI-enabled roadmap governance, stakeholder alignment and sprint governance, drawn from 20+ years in enterprise CRM/ERP product organisations. github.com/rammyps/product-operating-model-playbook
- **RAG & LLM workflows:** Semantic search with vector embeddings and LLM integrations (Claude API, Ollama) in Python and .NET.
