PROFESSIONAL SUMMARY

Product and Solution Analyst experienced in translating complex business requirements into feasible designs, precise functional specifications and successful releases. Specialises in Dynamics, Salesforce and SAP integrations supporting order-to-revenue and revenue recognition, with responsibility spanning feasibility, development, QA and UAT. Delivery experience includes Cathay Pacific, MoneyGram and Standard Chartered across APJ, EMEA and the US. Combines analytical depth with hands-on RAG and LLM development in Python and .NET, and coaches analysts and product owners on requirements quality.

EXPERIENCE & SKILLS

CORE COMPETENCIES

Functional Design & Analysis

Requirements Analysis · Feasibility Studies · Solution Overviews · Functional & Product Specifications · Interface & Integration Specifications · Data Mapping · Use Cases & User Journeys · Functional Walk-throughs · Acceptance Criteria · UAT & Release Sign-off

Integrations & Platforms

Microsoft Dynamics CRM · Salesforce · SAP S/4HANA · SAP RAR · SAP HANA · Integration Architecture · API-based Integrations

Domain

Airline eCommerce · Financial Services · Finance & Revenue (ASC 606 / IFRS 15) · Multi-country Rollouts · Audit Readiness

Delivery

SAFe PO/PM · Scrum · Backlog Refinement · Dependency & Risk Management · Onshore-Offshore, Multi-time-zone Teams · JIRA · Mentoring Analysts & Product Owners

Technology & AI

.NET / Blazor · Python / FastAPI · SQL Server · PostgreSQL / pgvector · RAG & Vector Search · LLM Integration (Claude API, Ollama)

Independent Consultant (Product Management)

Sep 2024 – Present

Remote

- Advise enterprise clients across APJ and EMEA on product and solution delivery, running roadmap, backlog and release governance under SAFe, with ROI reporting to client executives on every engagement.
- Run the product backlog on client engagements. Analyse business requirements, write functional specifications, user stories and acceptance criteria, lead backlog refinement and iteration planning, and sign off releases through UAT with client stakeholders.
- Design integration governance across Salesforce and SAP: interface ownership, data-flow standards and functional compatibility checks that keep parallel multi-country eCommerce programs aligned and compliant.
- Run 3+ concurrent country engagements under an AI-enabled product operating model (SAFe cadences, acceptance-criteria standards) without slipping on quality or timelines.
- Retain every active client for follow-on work, using TOGAF-aligned delivery frameworks across parallel multi-country eCommerce programs.

Director of Product Leadership — NielsenIQ

Sep 2022 – Apr 2024

Chennai, India (Hybrid)

- Designed a bi-directional Dynamics–SAP integration and governed data layer for order-to-revenue flows. Defined the solution design, data mappings and interface rules with architects and developers, removing 200+ manual hours a month for 500+ users.
- Redesigned seller workflows in Microsoft Dynamics CRM across 3+ business units and rationalised a Salesforce migration into fewer-click processes, cutting seller cycle time by 40%.
- Set functional-quality standards across releases (acceptance-criteria templates, structured discovery and feedback loops), cutting post-release rework by 30%.
- Prioritised the backlog on ROI, customer demand and business impact using MoSCoW, RICE and WSJF, agreeing trade-offs with business leaders across 3+ business units.
- Coached 5 product owners on requirements quality, story writing and Agile practice, lifting team velocity 25% within two quarters.

Product Owner / Business Analyst — Autodesk

Sep 2021 – Aug 2022

Bengaluru, India (Freelance)

- As SAFe Product Owner, analysed and refined a 200+ item SAP S/4HANA RAR (revenue recognition, ASC 606) backlog. Translated finance requirements into sprint-ready stories and acceptance criteria for onshore and offshore teams across 3 time zones.
- Mapped cross-team dependencies and set grooming standards before each iteration, cutting sprint-cycle ambiguity by 20%.
- Delivered 100% on-time sprint completion through early blocker identification and pre-sprint stakeholder alignment.
- Bridged finance and SAP functional teams with clear specifications in JIRA, with zero escalations from internal audit or external reviewers.

EXPERIENCE (CONTINUED)

Technical Product Owner (SCB) & Head of Operations — StratAgile

Apr 2019 – Aug 2021

Kochi, India

Technical Product Owner, Standard Chartered Bank (Unified Digital Platform, MARTECH tribe)

- Owned the backlog and functional rollout that migrated 350M+ annual page views and 1,500+ content editors across 10+ ASEAN markets to SCB's Unified Digital Platform, handling market-specific requirements under TOGAF principles.
- Defined a common theme and UI component library for product pages, improving page load speed by 35%.

Head of Operations

- Ran agile delivery for Cathay Pacific's digital program across APAC markets. Set up iteration planning and backlog refinement, owned requirements sign-off and release readiness with airline stakeholders, and delivered every release with zero missed deadlines.
- Led a 100+ member operations team across 14 countries running concurrent eCommerce and digital programs for 4 clients, including MoneyGram, BMW and Bursa Malaysia.

Independent Consultant I Product & Channel Programs

Aug 2017 – Mar 2019

India, Singapore, USA

- Defined user-journey-based solution designs for banks, manufacturers and oil-and-gas firms. Introduced Agile practice and aligned product, engineering and marketing teams.
- Designed channel-partner enablement and co-selling programs, refined through partner satisfaction surveys and performance reviews.

Partner Business Manager, SME Channels & COE — SAP

May 2008 – Jul 2017

Singapore

- Governed a 25+ partner ecosystem across 6 SEA markets and upskilled 100+ partners through 20+ APJ workshops on SAP HANA, S/4HANA and Business Objects.
- Built a lean onboarding playbook that cut partner time-to-first-deal to under 9 months. Closed SGD 250,000+ in SME license value through C-level joint go-to-market.
- Represented SAP at TechEd and InnoJam, and supported a 2M+ member global community as part of a 65-person team.

Earlier career: Senior Analyst, AOL Mobile (2007–2008): automated a Netezza reporting pipeline, removing the need for 2 FTEs. Senior Metrics & Reporting Analyst, Dell International (2002–2007): top 10 of 300 in the Global Black Belt quality programme.

AI PROJECTS (HANDS-ON)

RAG & LLM workflows

Semantic search with vector embeddings (PostgreSQL / pgvector) and LLM integrations (Claude API, Ollama) in Python and .NET.

Product Operating Model Playbook

Open framework for AI-enabled roadmap governance, specification standards and sprint governance, drawn from enterprise CRM and ERP product work. github.com/rammyps/product-operating-model-playbook

ikiastrro

Wrote the functional spec, built the application in .NET, SQL Server and Blazor, and validated every calculation against an established reference tool. github.com/rammyps/ikiastrro

EDUCATION

MS, Software Engineering
Birla Institute of Technology and Science (BITS), Pilani I 2007

B.E., Instrumentation and Control Engineering
SRM University, Chennai I 2002

CERTIFICATIONS

- SAFe PO/PM (Scaled Agile)
- SAP Certified Support Engineer, SAP HANA 1.0
- PMP Training (PMBOK)
- CompTIA A+
- TOGAF Awareness
- Dell Global Black Belt (Statistical Quality Control)
